1. PURPOSE

This document establishes the Terms and Conditions applicable to the use of the ADAMO SIGN Platform, a technological solution owned by ADAMO S.A.S., which allows Customers to

manage simple or advanced electronic signature processes, with robust authentication mechanisms, biometric validation and technical traceability.

Through ADAMO SIGN, Clients can electronically sign documents of legal, contractual or administrative content, from digital channels such as email, web interfaces or instant messaging platforms, with full legal validity in the terms established by Law 527 of 1999 and Decree 2364 of 2012.

The service includes functionalities such as:

- Definition of signatories and signature order;
- Authentication by OTP, biometrics, or other secure methods;
- Cryptographic hash generation and timestamp;
- Recording of electronic evidence (IP, date, geolocation, consent);
- Delivery of the signed document with integral traceability of the process.

ADAMO SIGN does not intervene in the content of the signed documents, nor does it act as a third-party certifier, notary or digital notary. Its role is limited to providing the technological infrastructure for the identification of the signatory and the collection of electronic consent, in accordance with the security and validity parameters established by Colombian regulations.

The Client is solely responsible for the legal effects arising from the signature, the legality of the content of the document and the effective binding of the signatory parties. The use of the Platform implies the express acceptance of these Terms and Conditions, which form an integral part of the contract for the provision of services signed with ADAMO.

2. APPLICATION OF THE TERMS AND CONDITIONS

These Terms and Conditions regulate the legal relationship between ADAMO S.A.S., a company legally incorporated under the laws of the Republic of Colombia, identified with NIT 9014662591-1, and any natural or legal person (hereinafter, the "Client") who accesses, uses or benefits, directly or indirectly, from the services offered through the ADAMO SIGN Platform. available on the official ADAMO website: <https://adamoservices.co>.

The express or tacit acceptance of these Terms and Conditions constitutes a legally binding agreement between the Client and ADAMO, by which it is understood that the Client has read, understood and accepted in its entirety both this document and the Personal Data Processing Policy, the Framework Services Agreement, and any other annexed document that regulates the contractual relationship between the parties.

The ADAMO SIGN service is designed to be used exclusively by companies that need to sign documents with legal validity, through electronic mechanisms. The Client must have the legal

capacity to hire and designate valid signatories, as well as guarantee the integrity and legitimacy of the document that is submitted for signature.

The use of the Platform by the Client or its authorized users implies automatic acceptance of these Terms and Conditions. If the Client does not agree with them, the Client must refrain from using the service.

ADAMO may limit, suspend or terminate access to the Platform when it detects breaches, improper use, impersonation, or any other conduct contrary to the law, these Terms and Conditions or the current contract, without this generating the right to compensation or claim by the Client.

3. SUPPLIER IDENTIFICATION AND CONTACT DETAILS

In compliance with the duty of information provided for in Law 1480 of 2011, it is hereby stated that the ADAMO SIGN Platform is operated by ADAMO, a company legally constituted under Colombian law, identified with NIT 9014662591-1, with its principal address in the city of Pereira, Colombia.

Its headquarters are located at Carrera 16 Bis # 8 – 24, Oko Tower Building, 6th Floor, and the official service channel is the email contact@adamoservices.co . For contact purposes, ADAMO also makes available the mobile telephone line +57 321 626 5361.

Any request, requirement, complaint or exercise of rights may be submitted through the aforementioned channels, which will be available during the business hours established in Colombian labor legislation or as indicated in the User Service Policy.

4. DEFINITIONS

For the proper interpretation of these Terms and Conditions, the following definitions are adopted, without prejudice to those contained in Law 527 of 1999, Decree 2364 of 2012 and other regulations that regulate electronic signatures in Colombia:

ADAMO SIGN: Technological platform operated by ADAMO through which Customers can manage the electronic signature of digital documents, through robust authentication mechanisms (OTP, biometrics or others), hash generation, time stamp and full traceability, with binding legal effects.

Authentication: A technical process by which the identity of the signatory is verified before authorizing the signing of the document. It may include methods such as one-time passwords (OTPs), biometric validation, facial recognition, or identity validation by the Customer.

Client: Legal or natural person who hires the ADAMO SIGN service and acts as the originator of the signing process. You have the power to upload documents, define signers, set up

authentication rules, and receive the signed document. It is responsible for the legality of the content and the contractual relationship with the signatories.

Electronic Contract: A legally binding agreement entered into and manifested by means of one or more data messages (e.g. e-mail, web forms or platforms). It covers any digital contract that does not rely on smart contract technologies or hash anchors, as long as the essential elements of consent, object, and lawful cause are present.

Electronic Document: Digital file of any nature (contract, declaration, authorization, format or other) that can be signed using the mechanisms provided by ADAMO SIGN and whose integrity and traceability are guaranteed by cryptographic functions.

Electronic Evidence: Set of technical data and digital records generated during the signing process (such as IP address, location, date and time, type of authentication, hash code, etc.) that allow the authenticity and integrity of the legal act carried out to be accredited.

Electronic Signature: A set of electronic data associated with a document, which allows the signatory to be identified and reflects their unequivocal intention to accept its contents. Within the framework of ADAMO SIGN, it can consist of simple signature or advanced signature, depending on the level of authentication used.

Signatory: A natural person designated by the Client to sign a document through ADAMO SIGN. The signatory must have legal capacity and be identified through technical authentication mechanisms implemented by the Platform.

Hash: A unique alphanumeric value generated by a cryptographic function applied to the content of an electronic document, which allows its integrity to be verified and to ensure that it has not been modified after its signature.

OTP (One Time Password): Numeric or alphanumeric key generated by the Platform, sent to the signatory by electronic means (such as SMS or email) and valid for a single use, for the purpose of authenticating their identity in the signing process.

Platform: Technological environment that includes the web modules, API, administrative panel, authentication channels, signature infrastructure, verification and electronic evidence that make up ADAMO SIGN.

Time Stamp: Digital record that certifies the exact date and time when an action was carried out within the signing process (for example: opening of the document, validation of the signatory, final signature), allowing to provide temporal certainty to the act.

Traceability: Chronological, technical, and secure record of all events associated with a signing process, including moments of access, authentication, signature, rejections, geographic location, IP address, and any other interaction performed by users or signatories.

Authorized User: Natural person linked to the Client, with valid credentials to access the Platform and manage signature flows, document configuration, file upload, process monitoring and evidence download. The Client is responsible for all actions taken by its users.

Biometric Validation: An authentication mechanism that allows the identity of the signer to be verified using physical features (such as facial recognition) that are compared against a database or a reference image, as part of the advanced signing process.

5. CHARACTERISTICS OF THE ADAMO SIGN SERVICE

ADAMO SIGN is a technological solution that allows Customers to manage electronic document signature processes through secure, reliable and legally valid mechanisms. The service is aimed exclusively at business environments (B2B) and allows the subscription of electronic documents with full legal effectiveness, in accordance with current Colombian regulations.

The use of the Platform includes, among others, the following functionalities:

- Uploading of electronic documents by the Client in PDF or other compatible formats;
- Definition of signers and configuration of the signing order, with the option of multiple signers in chain or in parallel;
- Signer authentication using secure methods such as OTP code, facial biometric validation, or combined authentication;
- Cryptographic hash generation and timestamp to ensure the integrity of the signed document;
- Full traceability record of each event (opening, signature, authentication, IP, location, exact time);
- Delivery of the signed document to the Client, accompanied by the technical evidence file (event log and hash);
- Management dashboard with tracking of active, signed, expired or failed signature processes;
- Possibility of integration via API for automatic flows or embedded signature on own platforms;
- Technical support and direct service channel for incident resolution, regulatory requirements and operational support.

The service can be provided under individual signature models or monthly plans, with differentiated rates according to the volume, the authentication method, the number of signatories and the type of signature (simple or advanced) complying with the characteristics of an electronic contract.

When a higher level of traceability or evidentiary strength is required, ADAMO SIGN may offer complementary functionalities such as blockchain integration for recording transactions in distributed networks, without replacing legally recognized signature mechanisms.

The legal validity of each document signed through ADAMO SIGN will depend on compliance with the technical and legal conditions of authentication of the signatory, integrity of the document, unequivocal consent and legal capacity of the parties.

ADAMO SIGN does not intervene in the drafting, content or legal validation of the document, and its role is limited to providing the technological infrastructure for the management of electronic consent with verifiable technical support.

6. USE AND REGISTRATION

6.1. B2B model and responsibility for authorisations

ADAMO SIGN is a platform designed for exclusive use in Business to Business (B2B) environments. The Client, in its capacity as a legal or natural person with legal capacity, acts as the Data Controller of the Personal Data of the signatories and users involved in the electronic signature flows managed through the Platform.

It is the Client's responsibility to ensure that the prior, express and informed consent has been obtained from all the owners of personal data processed within the framework of the signing processes, as well as the veracity of the information provided and the existence of a valid legal link with each signatory.

ADAMO acts as the Data Processor, under the terms of Law 1581 of 2012, and only executes the Client's instructions regarding the enabling of the signature mechanisms, without intervening in the content, validity or legal effects of the signed document.

6.2. Registration and documentation requirements

To activate the service, the Client must go through a registration process that includes:

- Creation of a corporate account on the Platform;
- Signing of the Framework Service Agreement and the Agreement for the Transfer of Personal Data; Provision of legal documentation that proves their existence and representation, such as a certificate of existence and legal representation, RUT, and identity document of the representative;
- Designation of one or more authorized users, who will have access to the document upload modules, signer configuration and process monitoring.

ADAMO may request additional documentation, perform identity validations, or apply risk filters before activating the account.

6.3. Service activation and security measures

Once the documentation has been validated and the contractual conditions have been accepted, ADAMO will activate the Client's access to the Platform within a period of no more than two (2) business days.

The Platform incorporates organizational and technological security measures, such as:

- Multi-factor authentication (2FA) for admin users;
- Differentiated roles for users (upload, view, audit);
- Access restriction by IP or device (configurable);
- Recording of activity logs and traceability of each operation;
- Encryption of data in transit and secure storage of evidence.

The Client is responsible for the proper use of its users' credentials and for immediately revoking the accesses of any person who is no longer required to interact with the Platform.

6.4. Grounds for Account Suspension or Termination

ADAMO may temporarily suspend or terminate access to the Platform in the following cases:

- Use of the service to sign documents with illegal, fraudulent or contrary to public order content;
- Breach of contractual obligations or non-payment;
- Providing false, incomplete, or inconsistent information;
- Evidence of impersonation, misuse of credentials, or tampering with the signing process;
- Request from a competent judicial or administrative authority;
- Termination of the contract without renewal or express extension.

6.5. Use of the Platform by Authorised Users

Customer's Authorized Users will be the only ones authorized to upload documents, configure signers, manage active processes and download evidence. The Client will be responsible for all actions carried out under its corporate credentials and must ensure that the use of the Platform is in accordance with the law, the Terms and Conditions and the purposes contractually provided.

ADAMO may block users in the event of detecting suspicious activity, unauthorized access or improper use of the service, in accordance with its security protocols.

7. DECLARATIONS AND COMMITMENTS OF USE

By accepting these Terms and Conditions, the Client declares that he/she has read, understood and accepted the rules governing the use of the ADAMO SIGN Platform, and undertakes to use it lawfully, safely and in accordance with the principles of contractual good faith, technical diligence and respect for current regulations.

In particular, the Client declares and undertakes to:

7.1. Use the Platform exclusively for legal, contractual or administrative purposes compatible with the purpose of the service, refraining from using it to sign documents with illicit or fraudulent content, impersonations or legal simulations.

7.2. Guarantee the veracity, legality and legitimacy of the documents submitted for signature, assuming full responsibility for their content, for the correct identification of the signatories and for the legal consequences arising from the signed acts.

7.3. Obtain in a prior, express and informed manner the consent of the signatories for the processing of their personal data, the use of authentication mechanisms and the signing of the document through digital means.

7.4. Not to alter, manipulate, simulate or interfere with the technical signing process, or allow unauthorized users to access the Platform or the assigned credentials.

7.5. Respect the operational and usage limits defined in the service contract, including the billing models per signature, maximum number of signatories, validity of the processes and storage of evidence.

7.6. Not to upload, process or transmit through the Platform content that is offensive, defamatory, discriminatory or that infringes the intellectual property rights, privacy or confidentiality of third parties.

7.7. Notify ADAMO of any security incident, unauthorized access, or breach that jeopardizes the integrity of the documents, the confidentiality of the signatories, or the security of the Platform.

7.8. To be liable to ADAMO, authorities and third parties for any damage arising from the improper use of the service, breach of these Terms and Conditions or the execution of acts contrary to the law or the contract in force.

8. COST OF SERVICE

The use of the ADAMO SIGN Platform is subject to the payment of an economic consideration by the Client, which may be determined under two main commercial schemes:

- Payment by individual signature: modality in which the Client pays a unit value for each document successfully signed through the Platform, in accordance with the tariff in force or contractually agreed;
- Monthly or Volume Plan: A modality in which the Customer pays a fixed fee for a certain number of signatures, users, or functionalities enabled during a monthly period.

The applicable value in each case will depend on factors such as:

- Number of signatories involved per document;
- Required level of authentication (OTP, biometrics, advanced signature);
- Duration of storage of evidence or signed documents;
- Integration via API or complementary services (e.g. blockchain);
- Customization or extended support requirements.

The rates will be communicated to the Client in the commercial proposal, the framework contract or the administrative panel of the Platform, and any modification will be informed at least five (5) calendar days in advance, except in the case of adjustments derived from regulatory, tax or technical conditions not attributable to ADAMO.

The Client declares to be aware that the execution of a signature by means of ADAMO SIGN implies the immediate consumption of the contracted service, and that the signed documents are not subject to technical review. Therefore, there will be no reimbursement once the signature flow has been successfully completed, unless a technical fault attributable to ADAMO is demonstrated that prevents the legal validity of the act.

ADAMO reserves the right to suspend access to the service in the event of late payment of contractual obligations, without prejudice to the corresponding collection actions and the right to demand late payment interest in accordance with Colombian legislation.

9. PAYMENT MECHANISMS AND CONDITIONS

The Client must make the payment for the contracted services in accordance with the commercial scheme previously agreed with ADAMO, either under the payment modality by individual signature, monthly plan, or any other contractually defined alternative.

Payments may be made through the following mechanisms:

- Interbank transfer to the account registered by ADAMO in the service contract or invoice;
- Automatic compensation, in cases where the Client has contracted more than one service from the ADAMO ecosystem;
- Other means previously authorized in writing by ADAMO.

ADAMO does not accept cash payments, money orders, anonymous consignments, or deposits into accounts not formalized by contract or invoice.

The invoice will be issued in accordance with Colombian tax regulations, in electronic format, and sent to the email registered by the Client. The invoice shall contain at least:

- The billing period;
- The description of the services used (signatures, users, authentications, storage, etc.);
- The unit or total value, as applicable;
- VAT and other applicable taxes.

Customer agrees to review each invoice received and report any objections within five (5) business days of receipt. If this period has elapsed without a complaint, it will be understood to have been accepted in its entirety.

Failure to pay entitles ADAMO to:

- Temporarily suspend the Client's access to the Platform;
- Withholding documents or technical evidence, until outstanding obligations are settled;
- Charge late interest at the maximum legal rate allowed in Colombia;
- Execute pre-judicial or judicial collection actions, without the need for additional prior notification.

ADAMO may issue recurring invoices on a monthly basis or based on the volume of consumption, and reserves the right to require advance payment based on the Customer's credit history or operational risk.

10. VOLUNTARY CANCELLATION AND REFUND REQUEST BY THE CUSTOMER

Given that the service provided through ADAMO SIGN is executed by means of electronic signature processes with immediate and technically irreversible legal effects, the Client understands and accepts that once the signature flow has begun, it will not be possible to cancel the transaction or request a refund of the amount paid, except in cases where there is a technical failure attributable to ADAMO that prevents the process from being validly completed.

However, the Client may request the preemptive cancellation of a signature flow only if the document has not yet been signed by any of the designated signatories. The request must be made in writing to the contact@adamoservices.co mail, within the first twelve (12) hours after the creation of the flow, and must contain:

- Identification of the Client and the authorized user who originated the process;
- Document reference number or code;

- Reason for the request;
- Statement that the flow has not been signed by any recipient.

In case of acceptance, ADAMO will proceed with the technical cancellation of the flow and confirm in writing the suspension of the process. If it was an operational error of the Client and no significant technical costs have been incurred (e.g. use of biometric validation, OTP sent, time stamps generated), the partial refund of the amount paid or the reactivation of the credit in the system may be considered.

No refund will be due when:

- One or more signatories have successfully completed the signing process;
- The Client has incorrectly configured the order, the signatory's data or the content of the document;
- Non-reversible technical elements (hash, evidence, tokens, storage) have been generated;
- There is a delay in the payment of other services contracted with ADAMO.

Refunds, when applicable, will be processed within fifteen (15) calendar days from the validation of the request, and may be subject to withholdings for administrative costs, taxes, bank fees or other applicable concepts.

11. INDEMNITY

The Client accepts and acknowledges that he/she is solely responsible for his/her use of the ADAMO SIGN Platform, as well as for the legal, contractual or non-contractual consequences arising from the content of the signed documents, the identity of the signatories and the validity of the legal relationship between the parties.

In this sense, the Client undertakes to hold ADAMO S.A.S., its employees, directors, suppliers and allies harmless against any claim, legal action, administrative investigation, sanction or request from third parties that may arise directly or indirectly from:

- The content, scope or legal effects of the signed document;
- The inclusion of unauthorized, impersonated, or illegal signatories;
- The lack of valid or informed consent of the signatories;
- The erroneous, incomplete or fraudulent configuration of signature flows by the Client or its users;
- The improper or unauthorized use of the access credentials to the Platform;

- Failure to comply with regulations on the protection of personal data, electronic contracting or intellectual property.

The indemnity obligation includes the reimbursement of all direct or indirect costs, expenses, fees and damages incurred by ADAMO for its defense or resolution of the dispute, including legal representation expenses, expert opinions, sanctions imposed or settlement agreements entered into to avoid litigation.

This obligation shall remain in force even after the termination of the contractual relationship between the Client and ADAMO, to the extent that the events giving rise to the claim occurred during the term of the contract or as a result of the previous use of the Platform.

12. PERSONAL DATA

ADAMO recognizes the importance of protecting the personal data processed within the framework of the provision of the ADAMO SIGN service, and undertakes to comply with the obligations established in Law 1581 of 2012, Decree 1377 of 2013, constitutional jurisprudence, the complementary rules of the general regime for the protection of personal data in Colombia and the Personal Data Processing Policy available on the official ADAMO website.

12.1. Personal Data Processing Policy

The processing of personal data collected, stored, used or transmitted in the context of ADAMO SIGN is carried out in accordance with ADAMO's Personal Data Processing Policy, which is available for consultation on <https://adamoservices.co>. This policy establishes the applicable principles, the purposes of the processing, the rights of the owners and the channels for exercising them.

12.2. Role of the parties

When using the ADAMO SIGN Platform:

- The Client acts as the Data Controller of the personal data of the signatories, authorized users and other persons involved in the signature flows;
- ADAMO acts as the Data Processor, in the terms defined by article 3 of letter e) of Law 1581 of 2012, executing only the documented instructions of the Client and applying security measures to preserve the confidentiality and integrity of the data.

12.3. Client's obligations as Data Controller

It is the responsibility of the Client:

- Obtain and retain the prior, express and informed consent of the owners whose data will be processed in the signing process;
- Inform the signatory about the use of their personal data, the identity of ADAMO as a Processor and the purposes of the processing;
- Refrain from uploading sensitive data without valid authorization from the owner, unless it is essential for the execution of the document (for example, facial biometric signature);
- To respond to the owners and competent authorities for any affectation derived from the failure to comply with their legal duties.

12.4. Personal Data Transfer Agreement

The activation of the service is conditional on the signing of a personal data transmission contract, which delimits the purposes, conditions of processing, duration, security measures, restrictions of use and mechanisms for reporting incidents.

In the event of the Client's refusal to enter into such a contract, ADAMO reserves the right not to initiate or suspend the processing of data associated with signature flows.

13. LEGAL VALIDITY OF ELECTRONIC ACTS AND ELECTRONIC SIGNATURE

The documents signed through the ADAMO SIGN Platform have full legal validity and probative force, in accordance with the provisions of Law 527 of 1999, Decree 2364 of 2012 and other regulations that recognize the functional equivalence between data messages and physical documents with a handwritten signature.

By virtue of this regulation, it is understood that:

- The electronic signature generated by ADAMO SIGN fully identifies the signatory, allows their consent to be verified, and ensures the integrity of the signed document;
- The use of authentication mechanisms such as OTP, facial biometrics, email validation or previously enabled credentials guarantees the authenticity of the signed act;
- The generation of the cryptographic hash, the time stamp and the traceability log constitute sufficient technical proof of the existence, authorship, chronology and integrity of the document.

The electronic records generated by the Platform (including the IP address of the signatory, approximate location, authentication events and supporting documents) have probative value and will be kept in accordance with the applicable legal regulations, in secure environments that allow their consultation, auditing or referral to authorities when required.

The Client expressly accepts that the acceptance, execution and perfection of legal acts by electronic signature is legal, valid and binding, and that he/she may not disregard the effects

of the signed document by the mere fact of having signed electronically, unless he/she is able to demonstrate its falsity or inaccuracy through the corresponding legal mechanisms.

14. LIABILITY

ADAMO provides electronic signature services through the ADAMO SIGN Platform under a regime of **obligation of means**, and not of result. This means that it undertakes to make available to the Client a technological infrastructure that is secure, robust, reliable and in compliance with applicable regulations, but does not guarantee that the use of the service by the Client produces specific legal effects, nor is it responsible for the content or substantial validity of the acts entered into between the signatory parties.

14.1. ADAMO's Limits of Liability

ADAMO will not be liable, in any case, for:

- The content, wording, legality or legal effects of the documents uploaded and signed by the Client or its authorized users;
- The identity, legal capacity or powers of the signatory, when the authentication has been correctly executed in accordance with the enabled methods;
- The improper, negligent or unauthorized use of the Platform by the Client, its users or unauthorized third parties;
- Failures arising from services or technological platforms external to ADAMO's control (such as email, messaging, internet or signatory devices);
- Economic, contractual or non-contractual losses resulting from the breach of the obligations agreed between the Client and the signatories;
- The ineffectiveness of the signed legal act when it derives from defects in the consent, lack of purpose, illegality of the content or simulation between the parties.

In any scenario in which a technical failure directly attributable to ADAMO is proven, its liability will be limited to the amount actually paid by the Client for the affected service, without in any case being recognized indirect damages, loss of profit or loss of opportunity.

14.2. Assumption of risk by the Client

The Client acknowledges and agrees that:

- You are solely responsible for the configuration of each signature flow, the definition of signers, contact details, the order of execution and the applicable internal rules;
- You assume the legal risk arising from the use of electronic signatures in your contractual relationships, including the burden of proving the signatory's consent in contractual disputes;
- It must implement complementary internal controls, document review mechanisms, and identity verification if it deems it necessary for its legal or business purposes;

- It has the duty to properly safeguard and manage the credentials of its users, revoke access when appropriate and prevent unauthorized use.

ADAMO may suspend the service in the event of detecting activities that compromise the security of the Platform, the legality of the acts held or compliance with these Terms and Conditions, without this implying a breach of contract or giving rise to any compensation.

15. GOVERNING LAW, DISPUTE RESOLUTION AND JURISDICTION

These Terms and Conditions, as well as any act, legal relationship, document, operation, controversy or interpretation derived from the use of the ADAMO SIGN Platform, shall be governed exclusively by the laws of the Republic of Colombia.

In particular, the following provisions shall apply:

- Law 527 of 1999, on the legal validity of data messages, electronic commerce and electronic signature;
- Decree 2364 of 2012, on electronic signature;
- Law 1581 of 2012, on the protection of personal data;
- Commercial Code, Civil Code, and other civil and commercial regulations on the formation and execution of contracts.

In the event of any difference, claim, controversy or conflict arising between ADAMO and the Client, the parties undertake to first exhaust a direct settlement stage, in which they will exchange written communications by electronic means, seeking an amicable solution. This stage will have a maximum duration of thirty (30) calendar days, counted from the formal notification of the claim.

If an agreement is not reached within that period, either of the parties may resort to the ordinary Colombian jurisdiction, and submit the dispute to the knowledge of the civil judges of ADAMO's main domicile, expressly waiving any other territorial or jurisdictional jurisdiction.

This agreement of jurisdiction shall prevail over any default rules, unless there is a subsequent written arbitration agreement between the parties or alternative mechanisms valid under the law are adopted.

16. INTELLECTUAL PROPERTY AND RESTRICTIONS ON USE

The ADAMO SIGN Platform, its source code, graphic design, operating logic, algorithms, interfaces, manuals, technical documentation, authentication functionalities, signature tools, electronic evidence, modular architecture, traceability database and all associated developments are the exclusive property of ADAMO S.A.S., and are protected by national and international regulations on intellectual property. copyrights, software, and trademarks.

The Client acknowledges and accepts that, by signing the service contract and accepting these Terms and Conditions, he/she does not acquire any ownership or ownership rights over the Platform, its components or its operation, or over the distinctive signs of ADAMO.

It is expressly forbidden for the Client, its users or any third party linked on its behalf:

- Copy, distribute, disassemble, modify, adapt, translate, reproduce, or create derivative works from the Platform or any part thereof;
- Perform reverse engineering, vulnerability scanning or penetration testing practices without express written authorization from ADAMO;
- Incorporate the Platform into other systems, applications, modules or commercial environments of your own or third parties without formal authorisation;
- Use ADAMO's trademarks, logos, trade names or visual elements for advertising, promotional or institutional purposes without prior written consent;
- Sell, lease, sublicense, or commercially exploit access to the Platform, directly or indirectly.

The Client's use of the Platform is strictly limited to the functional, technical and legal purposes derived from the subject matter of the contract and the authorised flows. Any unforeseen or abusive use will entitle ADAMO to suspend access, terminate the contract and take the corresponding legal actions.

Violations of this clause may give rise to civil, commercial and criminal liability, including the payment of compensation for damages, loss of profits and reputational damage, in accordance with the provisions of Law 23 of 1982, Andean Decision 351 of 1993, Law 44 of 1993, Law 603 of 2000, and other applicable regulations.

17. REPORTING MECHANISMS AND COMMUNICATION CHANNELS

ADAMO provides the Client with official service channels, through which they may report incidents, make queries, submit requests, raise claims or exercise their rights within the framework of the use of the ADAMO SIGN Platform.

Reports or communications should be addressed to:

- Official email: dataprotection@adamoservices.co .
- Hotline: +57 321 626 5361
- Physical address: Carrera 16 Bis # 8 – 24, Edificio Oko Tower, Piso 6, Pereira, Colombia

The Client may use these channels to:

- Report technical failures, operational errors, or crashes on the Platform;

- Request support on authentication, traceability, document or flow retrieval;
- Reporting unauthorized access, impersonation attempts, or security incidents;
- Submit complaints associated with billing, response times, or terms of service;
- Exercise your rights regarding personal data, in accordance with ADAMO's Data Processing Policy.

For the purposes of traceability and effective response, the Client must include in its communication:

- Sender identification (name, title, entity, registered mail);
- Signature flow identification number, if applicable;
- Detailed description of the event, date, time, and associated evidence;
- Contact channel for response notification or follow-up.

ADAMO will acknowledge receipt of the communication within five (5) business days and reserves the right to give priority treatment to security incidents, improper access, unauthorized use of credentials or possible breaches of personal data.

Anonymous reports or reports lacking minimal information may be rejected by ADAMO, without prejudice to activating preventive measures if the reported event compromises the security, legality or stability of the service.

Interaction through these channels is not a substitute for formal contractual claim procedures, nor does it imply automatic acceptance of liability by ADAMO.

18. VALIDITY, MODIFICATIONS AND ACCEPTANCE OF UPDATES

These Terms and Conditions are in force as of their publication on ADAMO's official channels and will remain in force throughout the contractual relationship between the Client and ADAMO, or as long as access to or use of the ADAMO SIGN Platform is maintained, whichever occurs first.

ADAMO reserves the right to modify, update or supplement this document at any time, when required:

- Changes in applicable law or regulation;
- New functionalities, technological improvements or adaptations of the Platform;
- Adjustments in commercial schemes, internal policies or operating conditions of the service;
- Recommendations from data protection authorities, sectoral regulators or control bodies.

Updates will be published on the official ADAMO website and/or within the Platform, with a clear indication of the effective date. In cases where the modifications imply material changes to the Client's obligations or to the terms of service, ADAMO may:

- Notify the Customer by registered email;
- Request their express acceptance through the Platform before continuing with the use;
- Suspend access to certain flows until such acceptance is confirmed.

In all other cases, continued use of the service after the publication of the new version shall be deemed to imply tacit and binding acceptance of the new Terms and Conditions.

ADAMO will retain previous versions of this document and may make them available to the Client or to the competent authorities upon request.
